

Designer

I am a designer with a unique background in product design, graphic design, and architecture and extensive international work experience. After contributing to world famous buildings, interiors, books, and exhibitions, I am seeking an opportunity to funnel my passion for good and meaningful design and problem solving skills into product design, and am eager to become part of a team where I can continue to contribute to thriving innovation.

When not at work

Depending on the season, you will find me on my windsurf board, skis, or bike, occasionally playing my violin or more recently just listening to some classical music.
